EMPLOYMENT

Mechanical Design Engineer – New Holstein, Wisconsin

We are currently looking to add a Mechanical Design Engineer to our Attachments Division located in New Holstein, Wisconsin. This challenging position will be responsible for creating, designing and improving various attachment products. Requires a strong understanding of mechanical and hydraulic principles. This position will also lead research and development projects including the building of prototypes and conducting product testing. Other key duties include compiling bills of materials, working with parts vendors, providing technical assistance to customers and creating work instructions for manufacturing.

Requirements:

The ideal candidate will have:

- A Bachelor's Degree in Mechanical Engineering, Engineering Technology or a related field of study
- Five or more years of related design or manufacturing experience (preferably in a metal fabrication environment)
- Working knowledge of Pro-Engineer software preferred

Additionally, to be successful in this position the ideal candidate will possess:

- Ability to communicate effectively and professionally with a variety of people, both written and verbal.
- Ability to plan, prioritize and organize work effectively.
- Ability to work effectively under pressure and meet time deadlines.
